

Machine Features:

- **Two Button Vend Selection** - 1 gallon or 5 gallon vend for customers.
- **Customized Pricing** – as the owner of the machine you set the price for water vends.
- **Two Way Communication App** – Monitor machine functions from your smart phone, tablet or laptop.
- **7 Stage Reverse Osmosis Filtration**–Removes any contaminants, toxic metals, dissolved solids, chlorine, as well as unwanted odors found in the water.
- **Eye Catching Graphics** – The Water Kooler comes standard with a blue canopy, lexan graphics, back lit marquee and LED lights underneath the canopy to illuminate the machine at night.
- **Minimal Waste Technology** – Three 20" Reverse Osmosis Membranes are used to filter and purify the water. The machine operates at close to a 2:1 water ratio i.e. just less than 2 gallons of water is required to produce 1 gallon of purified RO filtered water.
- **Multiple Payment Options** – CPI Bill Validator and Coin Mechanism, Nayax Debit and Credit Card Reader, Google and Apple Pay.
- **Aluminum Frame** – Constructed with high strength, corrosion-free Aluminum Alloy to ensure a durable, long lasting, rust-free life.

Machine Specifications:

- **Machine Dimensions** – 102 7/8" Tall w/ Canopy, 78 3/4" w/o Canopy, 44" wide, 37 3/4" deep
- **Machine Weight** – 700 lbs
- **Utilities** – 110 V Single Phase Electric with 15 Amp Service. 1/2" Water Supply Line. 3/4" Water Drain Line.

Environmentally Friendly – Naturally Green!

The Water Kooler was designed as an environmentally friendly machine that sells 1 gallon and 5 gallon vends of purified water. Our **Minimal Waste Technology** uses 3 Reverse Osmosis Membranes to reduce waste water substantially allowing the machine to create purified water at a 2:1 or less ratio. This gives machine owners the potential to save thousands of gallons of water per month. This makes the Water Kooler the most cost effective and environmentally friendly water vending machine on the market today.

The Water Kooler - Purified Water Vending Machine

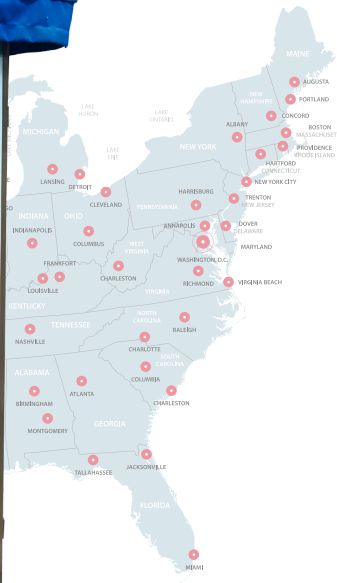

TURN WATER INTO PROFITS WITH THE WM3000

LOW OPERATING COSTS – MINIMAL TIME COMMITMENT

ENGINEERED AND DESIGNED BY KOOLER ICE – THE LEADERS IN ICE AND WATER VENDING MACHINES

With over 1,600 machines operating in 45 states, Australia, the Bahamas, Canada and Martinique, Cooler Ice continually leads the ice and water industry with its products and innovations!

*After creating 7 different
ice and water machines over the
past 14 years, we are proud
to put that knowledge and
experience to work in the design
and development of the “Water
Kooler”, the most advanced and
innovative stand-alone water
vending machine on the market!*

Environmentally Friendly and Cost Effective

The Water Kooler was designed as an environmentally friendly machine that sells 1 gallon and 5 gallon vends of purified water. Our **Minimal Waste Technology** uses 3 Reverse Osmosis Membranes to reduce waste water substantially. Most water vending machines use a 3:1 or 4:1 ratio, meaning it takes 4 gallons of water to make 1 gallon of drinkable, purified water. This is very wasteful because these machines send thousands of gallons of water down the drain every month.

The Water Kooler is designed to operate at or below a 2:1 ratio. By operating at a 2:1 or lower ratio, there is potential to save thousands of gallons of water per month. This makes the Water Kooler the most cost economical and environmentally friendly water vending machine on the market today by substantially reducing water costs for the retailer or machine owner.

**Save Hundreds of Dollars Annually on Your Water Bill with our
Minimal Waste Technology.**

MANAGE YOUR MACHINE ANYTIME, ANYWHERE

The Water Kooler comes with our proprietary two-way communication system allowing you to manage your water vending machine anytime, anywhere with a smartphone, laptop or computer. This allows you to work smarter, rather than harder, when it comes to managing your water vending business. This two-way communication app allows you know the following:

- Track how much cash is in the machine at all times.
- Track sales (daily, weekly, monthly).
- Reset the bill validator to clear bill jams.
- Notify you if a filter needs changing.
- Place the machine in free vend or sold out mode.
- Turn the machine on or off remotely.
- Deliver a free a vend of 1 or 5 gallons of water.

CERTIFICATIONS TO PROTECT YOU AND YOUR CUSTOMERS

NAMA Listed – The Water Koolers has been tested by NAMA and complies with the latest Federal Guidelines for Sanitation and Safety for Water Vending Machines. This certification is important and required by the Agriculture Departments of many states.

UL Listed – The Water Kooler has been tested against the latest electrical and safety standards under UL 541. When applying for permits the UL listing is very important.

ADA - The Water Kooler meets the latest American's with Disability requirements. Many cities are enforcing this act and require vending machine operators to comply with the latest ADA requirements.

WORLD CLASS SUPPORT

Service is a top priority for our organization and is embedded deep into our culture. We will be there to assist you from the time you begin considering the Water Kooler and the water vending business, through your many years as a water vending machine owner. As a machine owner you will have access to:

- **1-800 Service Hotline** – Available 12 hours a day everyday of the year and staffed with highly trained service technicians to answer your questions on the spot.
- **Online Parts Store** – Need a filter, part or promotion item? You can browse and order off our online parts store when convenient for you, day or night.
- **Marketing and Promotion** – Our in-house marketing team can provide you with the tools you need to promote your machine on site or through social media.
